

Assembly Instructions for #84063 Pink Water Lily Solar Floral Stake

- ① Drop hub with drilled holes into upper pole shaft. Secure top with end cap.

- ② Insert the 6 petals by inserting one tab of each petal in the lower row of holes, and the opposite tab in the top row of holes, so that the petal is fixed at a slight angle. Push hard to secure. The petals should slightly overlap one another.

- ③ With all 6 petals now inserted into the upper and lower rungs of holes, you have created a beautiful Water Lily.

- ④ Insert the finished pole into the ground shaft with pointed tip and drive it into soft ground. The Water Lily adorns your garden during the day and glows in different colors at night!

BE SURE TO CHECK YOUR FACTORY PREINSTALLED BATTERIES to see if they are still working. If not, replace batteries before using the solar stake.
